

Patient Instructions for Pulmonary Function Testing

What is a Pulmonary Function Test?

A pulmonary function test, PFT for short, is a non-invasive diagnostic test that provide measurable feedback about the function of the lungs. By assessing lung volumes, capacities, rates of flow, and gas exchange, PFTs provide information that, when evaluated by your doctor, can help diagnosis certain lung disorders.

Reasons a Patient is Often Referred for a PFT:

- | | |
|--|--|
| <input type="checkbox"/> Asthma | <input type="checkbox"/> Sleep Apnea |
| <input type="checkbox"/> COPD | <input type="checkbox"/> Sarcoidosis |
| <input type="checkbox"/> Interstitial Lung Disease | <input type="checkbox"/> Bronchiectasis |
| <input type="checkbox"/> Occupational Lung Disease | <input type="checkbox"/> Alpha 1-Antitrypsin |
| <input type="checkbox"/> Chronic Cough | <input type="checkbox"/> Shortness of Breath |

Need to Know

- The test is completely painless and does not involve an exercise component. However, you are required to put in an effort in terms of different breathing techniques required for testing. You will be guided by a Respiratory Therapist/Educator and your appointment will last 30-60 minutes, depending on the test.
- Peak Pulmonary Function Laboratories will call you to schedule an appointment time and location that is convenient for you.
- *Please arrive at least 15 minutes before your appointment time in order to fill out a respiratory questionnaire.*
- Please do not smoke prior to your appointment.

If you are on a Inhaler/Puffer:

- Please bring all your inhalers/puffers whether you are currently using them or not.
- If you are able, DO NOT use your blue rescue inhaler/puffer (Ventolin, Salbutamol, Airomir, Apo-Salvent or Bricanyl) at least 6 hours prior to your appointment.
- If you are able, DO NOT use any other inhalers/puffers for at least 24 hours prior to your appointment.
